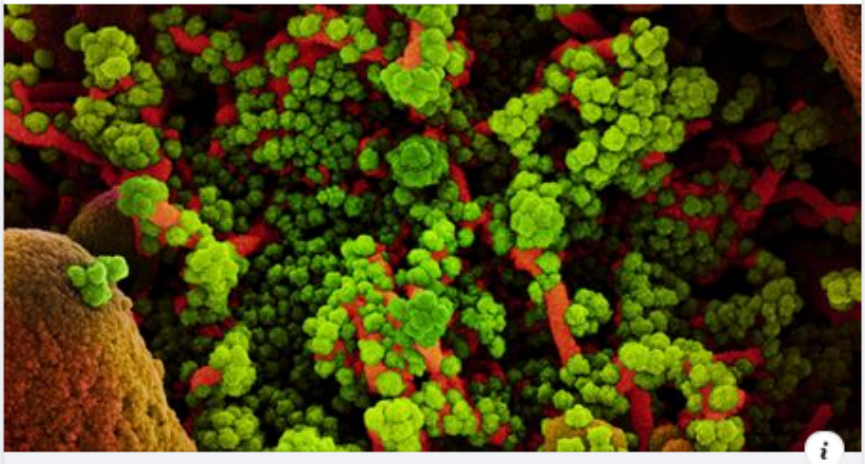

EXHIBIT 1

National Institutes of Health (NIH)
June 24, 2021 ·

A new observational study has begun to evaluate the immune responses generated by COVID-19 vaccines administered to pregnant or postpartum people. Researchers will measure the development and durability of antibodies against SARS-CoV-2, the virus that causes COVID-19, in people vaccinated during pregnancy or the first two postpartum months. Researchers also will assess vaccine safety and evaluate the transfer of vaccine-induced antibodies to infants across the placenta and through breast milk. https://www.nih.gov/.../nih-begins-study-covid-19...

NIH.GOV
NIH begins study of COVID-19 vaccination during pregnancy and postpartum
Researchers will evaluate antibody responses in vaccinated participants and their infants.

Idk how you could even imagine taking this new "safe" vaccine while pregnant with all the unknowns and putting yourself and unborn child in potential danger
Like · Reply · 27w 12

Tanica Hesselgesser
Lindsey Drake fear is a powerful thing.
Like · Reply · 27w

Lindsey Drake
Tanica Hesselgesser has nothing to do with fear . And everything to do with the fact other vaccines take 10+ years to be deemed safe and the covid vaccine takes months and is deemed "safe" other vaccines were created , studied, waited to see the short and long term effects on people and their children that are born before they were deemed safe. But the covid vaccine didn't need to do any of that to be deemed safe ?? How do you know in 5 years this vaccine doesn't effect your reproductive system because they didn't wait to see if that was a long term effect or not. It's nothing to do with fear and everything to do with the unknown and lack of information on what this vaccine will do and cause down the road .
Like · Reply · 27w 2

Tanica Hesselgesser
No, I was saying they used fear of covid to persuade these women to

Lindsey Drake Tell me you're not qualified to discuss science without telling me.

Like · Reply · 27w · 2

Lindsey Drake
Tanica Hesselgesser oh yes that's very true! I misunderstood your comment I'm sorry.

Like · Reply · 27w · 1

Dawn Sizemore
Lindsey Drake agreed. People tend to confuse "authorized" with "approved". None of these shots (they are not vaccines per se) have been approved. It took over 10 years of research to get the polio vaccine correct and in those 10 years, from the first mass inoculations, until FDA approval, a lot of children suffered paralysis and death because there was a false sense of security about being inoculated. No one should be forced or shamed into this thing. Especially people of child bearing age.

Like · Reply · 27w · 1

Tanica Hesselgesser
Lindsey Drake no problem! I agree with you completely! The lack of studies and data and yet touting it as safe and effective is making me crazy!

Like · Reply · 27w

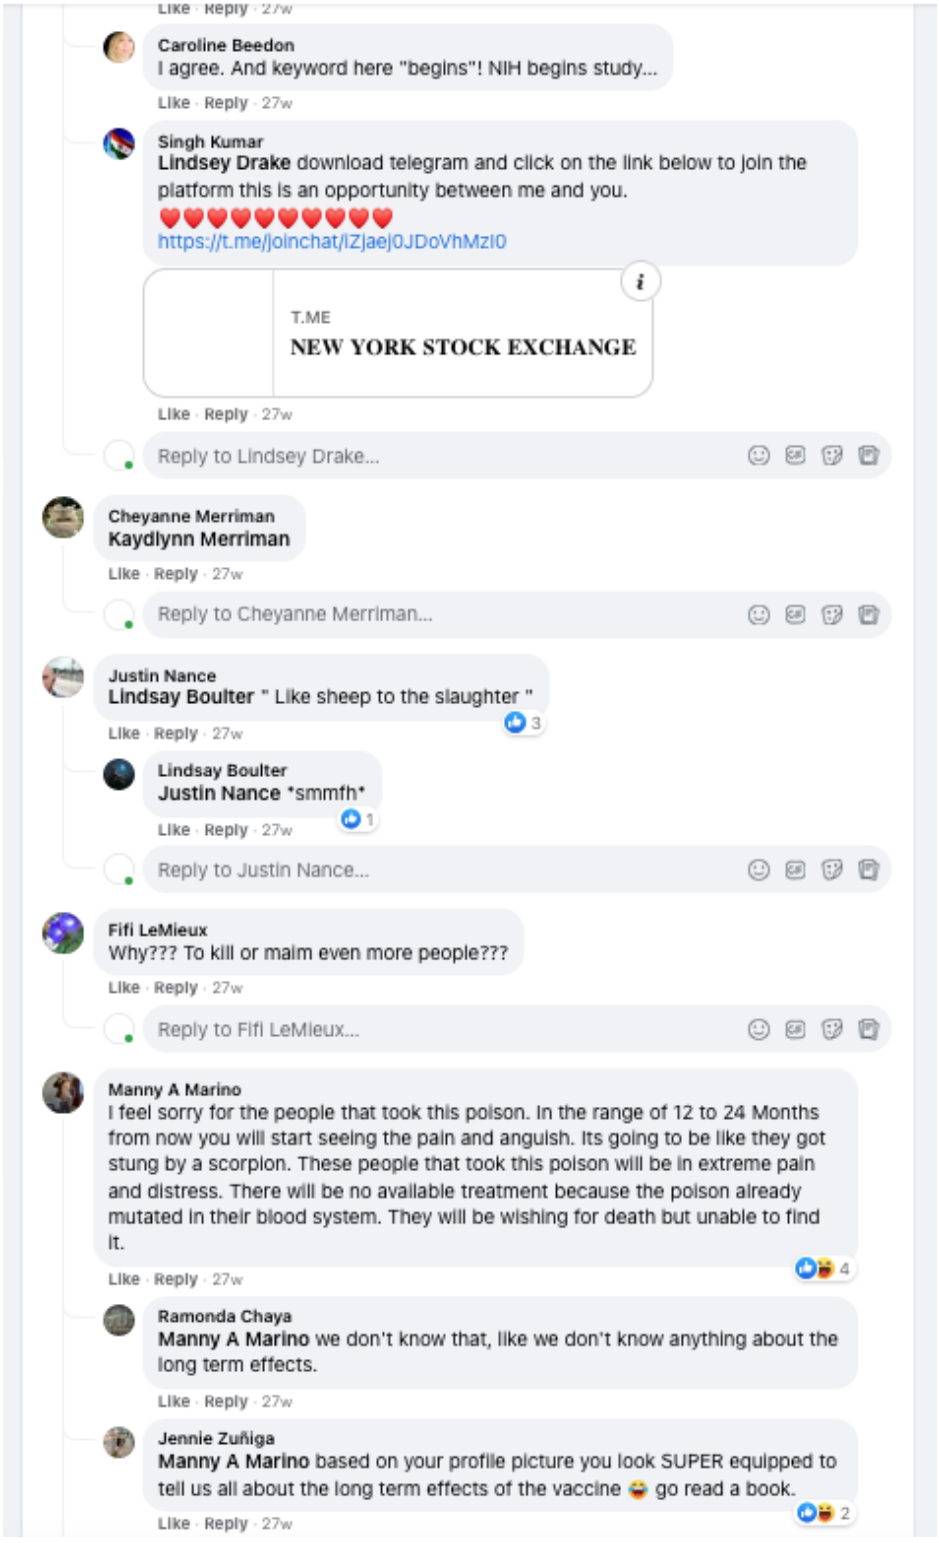

Lindsey Drake
Alan D Curtis II never said I was "qualified" I love science but there's not enough evidence, data, proof to back it up and deem it safe. And if it took 10 years for other shots why'd it only take a few months for this one . I'd be here all day if I stated all the odd things about this shot .

I've been hearing about this forever
It's funny that people think this is new. Way before 2020 there was viruses swine flu all that crap. Now the government wants to take is serious? People die and are born everyday since the beginning of time. I don't think most of us understand that the government is corrupt and trying to control us. We claim it's from China but what makes you think our own government didn't have nothing to do with this? Since Bush even before than the government has hid so much bs from us. Like even me telling you this makes my blood hot the fact that our government is cowards. The government want us to hate each other so we can be separated that way we can be less populated. **** the vaccine shot **** the microchip. I'm not letting the government control my every move.
We are living in the end of times. And if that means the government locks me up because I don't put a ******* microchip in my body. So be it... At least I know I'll be with God when I die. That's what separates the die hard believers of God and the cowards that let the government control them. Anyways have a nice day. If anyone has a problem with what I said you can see me face to face.

Glen-Tricia Glidewell
I know and do appreciate the continued and on going studies relating to this COVID-19 and the many variants.
As a parent of a child who contracted an encephalitis virus back in June 1980 (yes, I know the COVID-19 et.al. Viruses and Encephalitis Virus - Coxsackie type b - are two different viruses) and she struggled for 37 years with the many health issues that effected many parts of her body, until her body just gave out. So I am very aware that Viruses can unknowingly affect many areas of the body than we might want to believe they can and do.
One of the many areas that she had that changed was not only her personality but went from a very timid to often times aggressive in her behavior. We were told that the virus had caused that change.
With the increase in and openly heightened aggression that we all are experiencing around our country, it makes me wonder if the study on what this virus can do to different parts of the brain could be the reasoning behind this increase of so many people acting out so aggressively. This should be one study that just might awaken the "anti-vaxers" to actually getting the vaccine if they only knew what the virus could do to their brains if they get the virus. Just a consideration for research and study.

Like · Reply · 27w · Edited 4

Silvia League
Glen-Tricia Glidewell anti-COVID vax are only waiting for the experiment to end because we do not want to be part of that gene therapy experiment... There are also specialist who are worry about the spike protein that is in the experiment that can go to the brain and causes even more damage than the virus🤦‍♀️. If they keep censoring Nobel prize scientists worries and not accept the debates and give answers about it, we won't trust it... just a consideration for the big bosses

I did an article review during Graduate school on this topic. Kansas has the highest infant mortality rate for black babies. Too many of them are born premature or underweight (low birth weight).

Like · Reply · 17w

Alyssa Bienemann
The article I reviewed focused on both maternal health and infant mortality for black women and babies.

Like · Reply · 17w

Reply to Alyssa Bienemann...

Karen Owens
It is known that maternal mortality rate in the U.S. is significantly higher among black women compared to women of other races. The authors looked at a set of death certificates reporting maternal deaths among women of any race from 2015-2017. They found that maternal mortality in this group was 3.5 times higher among black women compared to non-Hispanic white women. Please scroll up and click on the article title (in bold type) to get information on the specific causes of death in this study.

Death is racist. Heard it here first. Good work sniffing that out NIH! Looking forward to your next breakthrough!

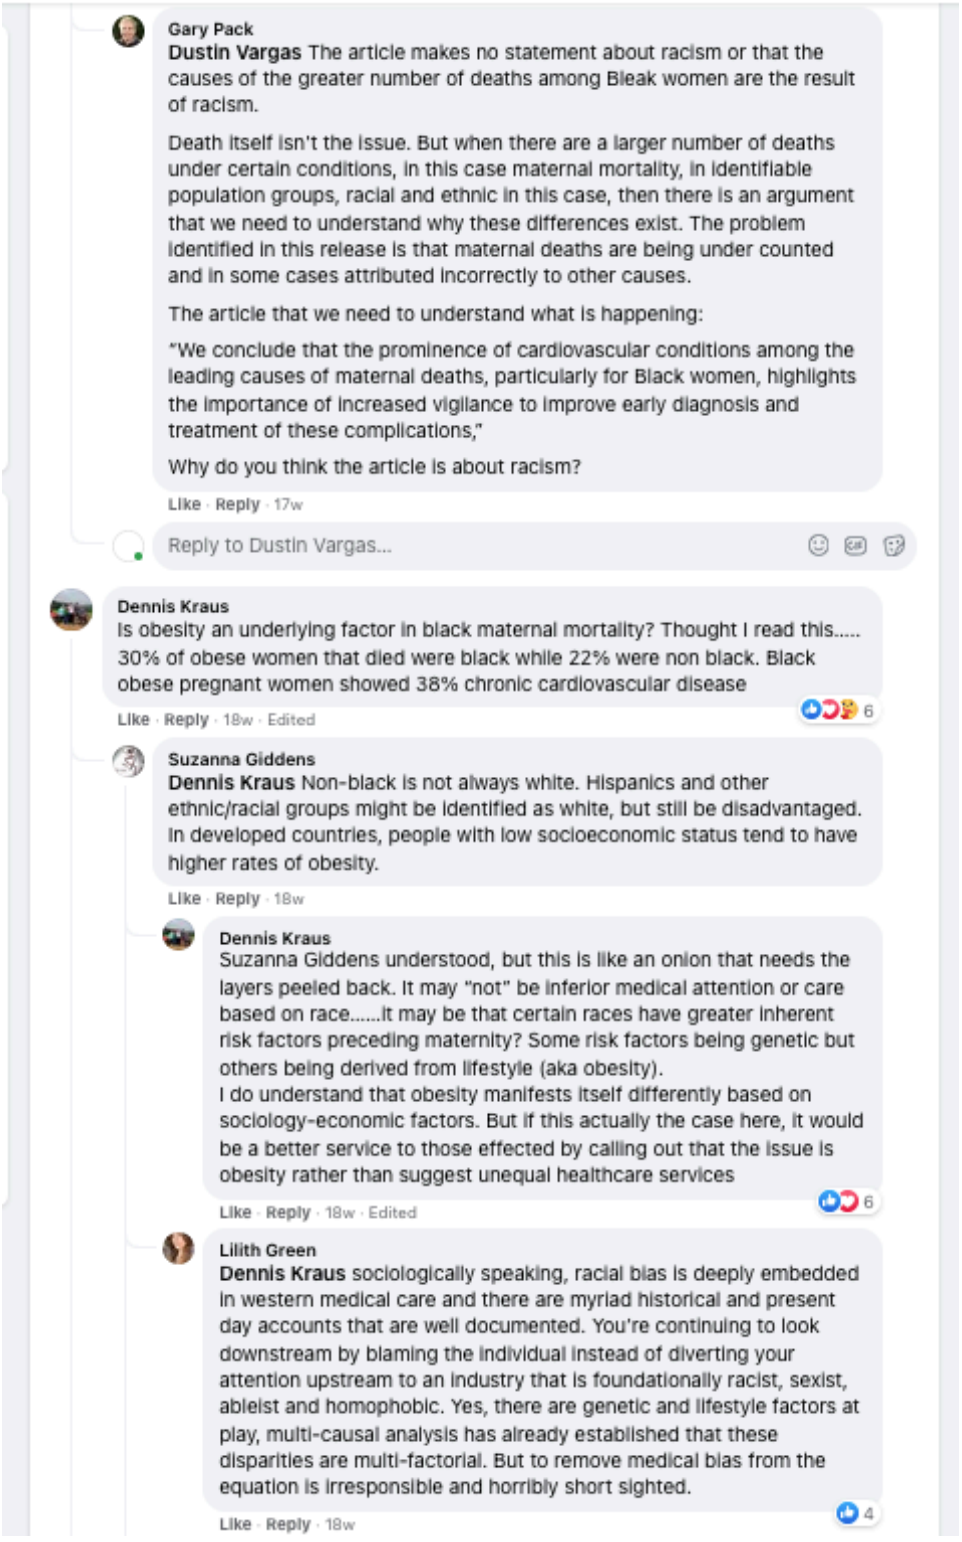

Like · Reply · 17w · Edited 1

Gary Pack
Dustin Vargas The article makes no statement about racism or that the causes of the greater number of deaths among Bleak women are the result of racism.

Death itself isn't the issue. But when there are a larger number of deaths under certain conditions, in this case maternal mortality, in identifiable population groups, racial and ethnic in this case, then there is an argument that we need to understand why these differences exist. The problem identified in this release is that maternal deaths are being under counted and in some cases attributed incorrectly to other causes.

The article that we need to understand what is happening:

"We conclude that the prominence of cardiovascular conditions among the leading causes of maternal deaths, particularly for Black women, highlights the importance of increased vigilance to improve early diagnosis and

Gary Pack
Dustin Vargas The article makes no statement about racism or that the causes of the greater number of deaths among Bleak women are the result of racism.

Death itself isn't the issue. But when there are a larger number of deaths under certain conditions, in this case maternal mortality, in identifiable population groups, racial and ethnic in this case, then there is an argument that we need to understand why these differences exist. The problem identified in this release is that maternal deaths are being under counted and in some cases attributed incorrectly to other causes.

The article that we need to understand what is happening:

"We conclude that the prominence of cardiovascular conditions among the leading causes of maternal deaths, particularly for Black women, highlights the importance of increased vigilance to improve early diagnosis and treatment of these complications,"

Why do you think the article is about racism?

Dennis Kraus
Is obesity an underlying factor in black maternal mortality? Thought I read this..... 30% of obese women that died were black while 22% were non black. Black obese pregnant women showed 38% chronic cardiovascular disease

Like · Reply · 18w · Edited 6

Suzanna Giddens
Dennis Kraus Non-black is not always white. Hispanics and other ethnic/racial groups might be identified as white, but still be disadvantaged. In developed countries, people with low socioeconomic status tend to have higher rates of obesity.

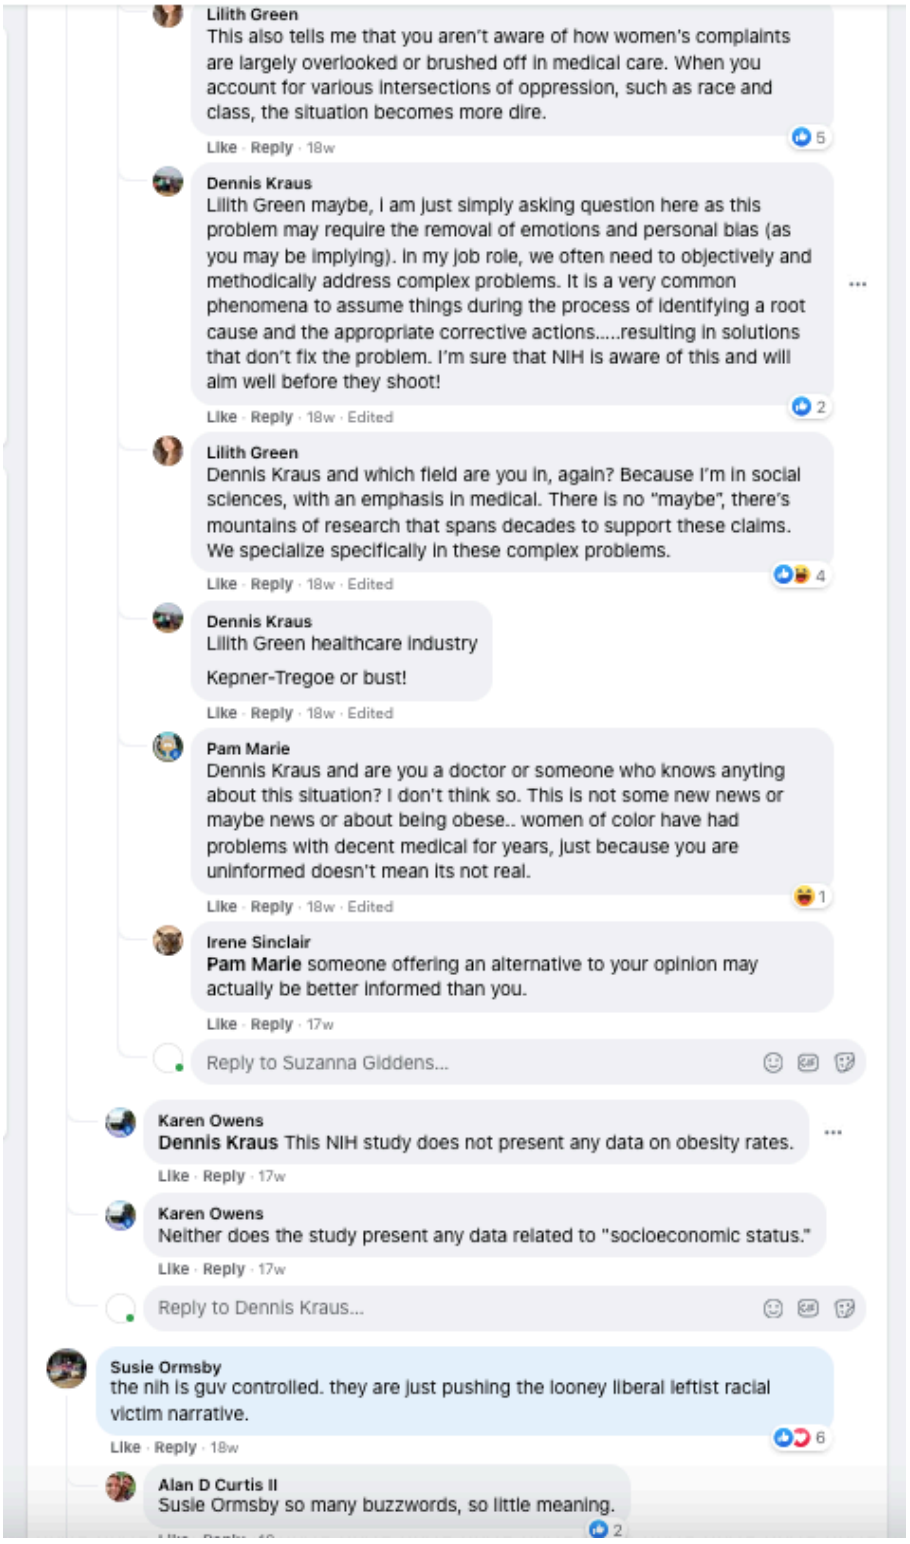

Like · Reply · 18w

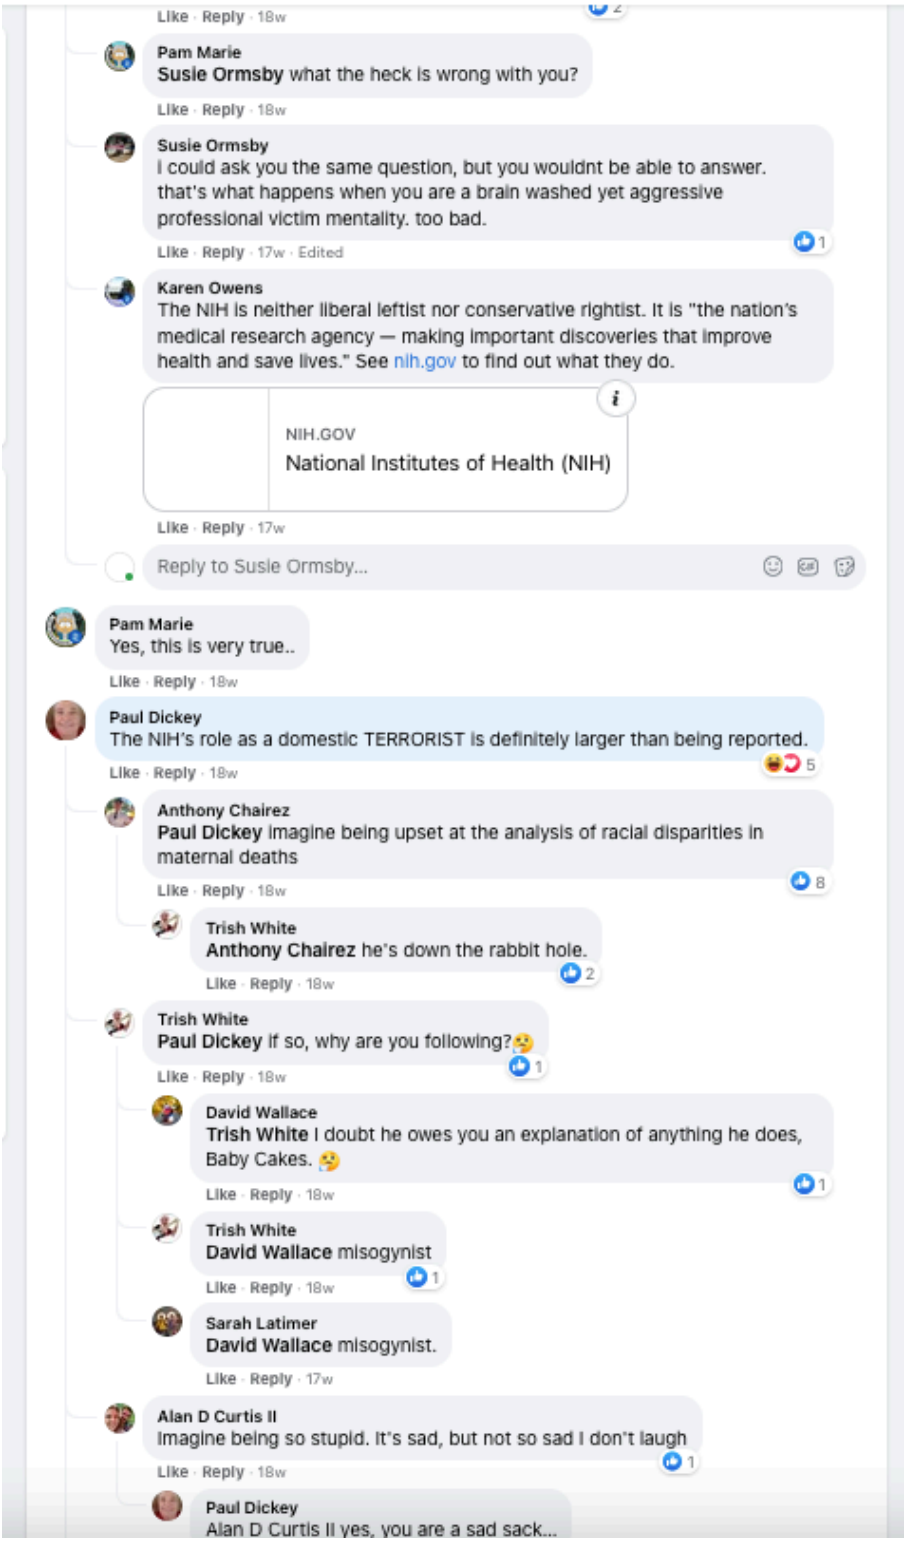

Dennis Kraus
Suzanna Giddens understood, but this is like an onion that needs the layers peeled back. It may "not" be inferior medical attention or care based on race.....it may be that certain races have greater inherent risk factors preceding maternity? Some risk factors being genetic but others being derived from lifestyle (aka obesity).
I do understand that obesity manifests itself differently based on sociology-economic factors. But if this actually the case here, it would be a better service to those effected by calling out that the issue is obesity rather than suggest unequal healthcare services

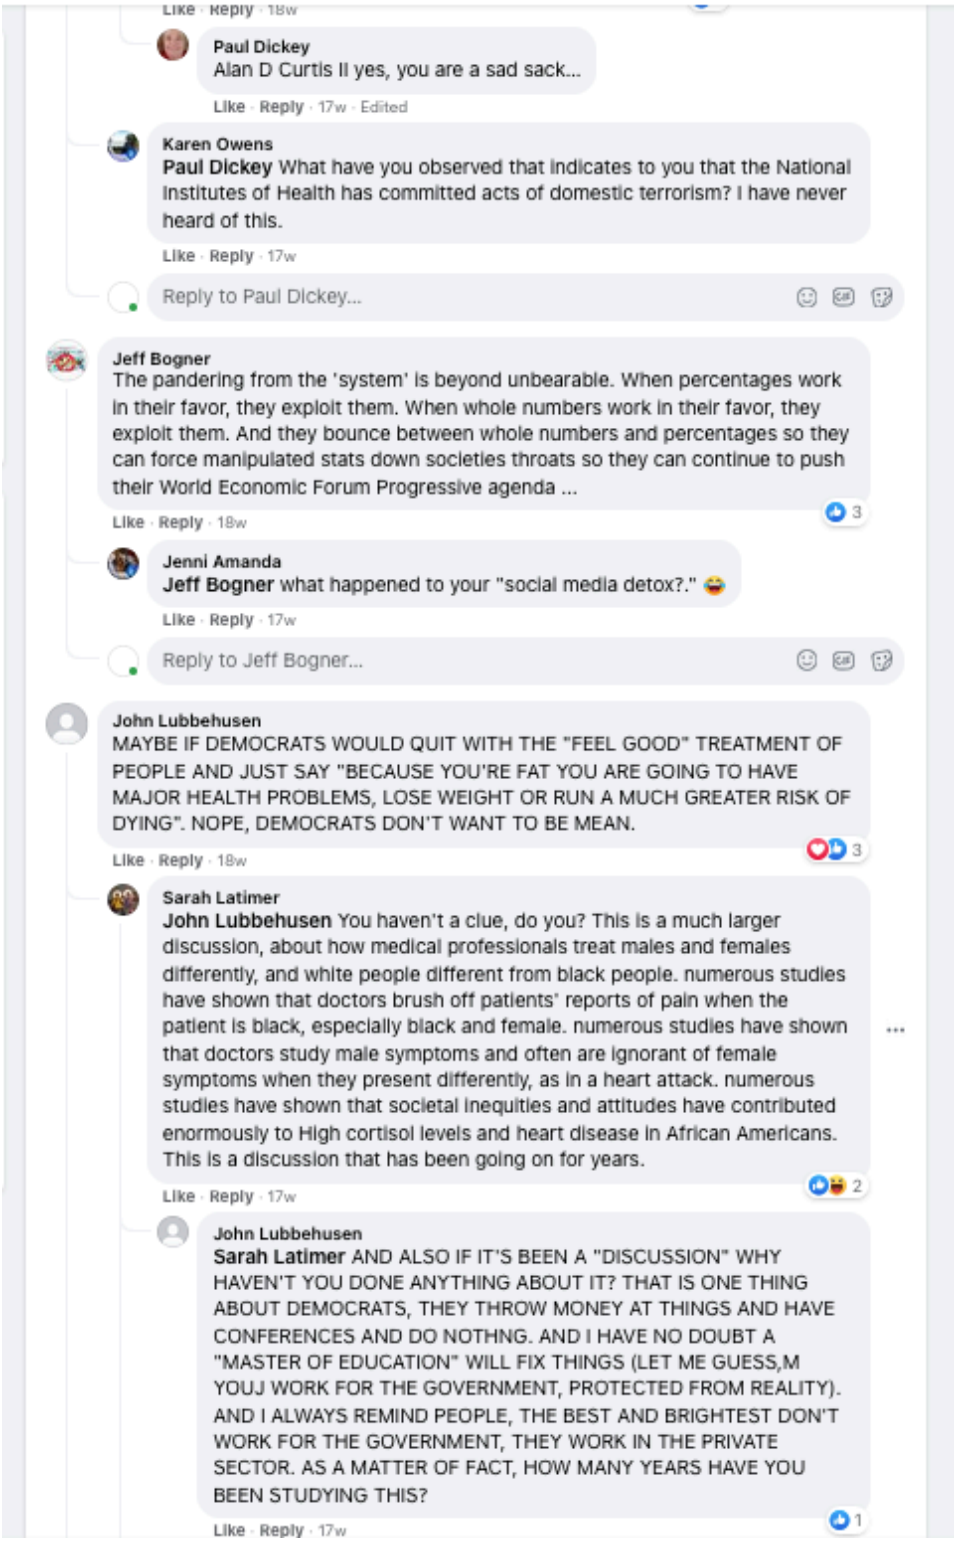

Like · Reply · 18w · Edited 6

Lilith Green
Dennis Kraus sociologically speaking, racial bias is deeply embedded in western medical care and there are myriad historical and present day accounts that are well documented. You're continuing to look downstream by blaming the individual instead of diverting your attention upstream to an industry that is foundationally racist, sexist, ableist and homophobic. Yes, there are genetic and lifestyle factors at play, multi-causal analysis has already established that these disparities are multi-factorial. But to remove medical bias from the equation is irresponsible and horribly short sighted.

Like · Reply · 18w 4

Lilith Green
This also tells me that you aren't aware of how women's complaints are largely overlooked or brushed off in medical care. When you account for various intersections of oppression, such as race and class, the situation becomes more dire.

Dennis Kraus
Lilith Green maybe, I am just simply asking question here as this problem may require the removal of emotions and personal bias (as you may be implying). In my job role, we often need to objectively and methodically address complex problems. It is a very common phenomena to assume things during the process of identifying a root cause and the appropriate corrective actions.....resulting in solutions that don't fix the problem. I'm sure that NIH is aware of this and will aim well before they shoot!

John Lubbehusen You haven't a clue, do you? This is a much larger discussion, about how medical professionals treat males and females differently, and white people different from black people. numerous studies have shown that doctors brush off patients' reports of pain when the patient is black, especially black and female. numerous studies have shown that doctors study male symptoms and often are ignorant of female symptoms when they present differently, as in a heart attack. numerous studies have shown that societal inequities and attitudes have contributed enormously to High cortisol levels and heart disease in African Americans. This is a discussion that has been going on for years.

Michelle Macky All the people who have suffered after being vaccinated or death. 😢 I understand it's not one size fits all this so called vaccination! No one knows on any specific vaccine or drug how it will affect them. I had a flu vaccination once. Was in the hospital a month, in a coma for a week with meningitis. My daughter had a flu vaccination just before COVID-19. Poor 37 yr. old had pityriasis rosea all over her body for months. We believe she had COVID-19 in the very beginning 2020 but they weren't testing people then. My doctor said the vaccination it would probably kill me. I can't take antibiotics without reactions. So I do what is best with my body. Plus I know vaccinated people sick with COVID-19 too. Some died being vaccinated too. 😢 How in God's name do the big pharma know how in any situation a person's body will react to either getting COVID. Or a vaccination who can do more harm for them? It's a shot in the dark with or without. 🙏Prayers for us all. ❤️🙏

Erica Alice we need honesty. Today one of my colleagues was describing an interaction she had with her fully vaccinated patient. The patient shared that she lost her son on Mother's Day. Her son took the 2nd dose of p.jab and started to feel ill. 2 weeks later he had a myocardial infarction at the gas station. He was 30 years old with no COMORBIDITIES. Two physicians told her it was likely caused by the p.jab ...however the coroner refused to put that on the death certificate.
She is now blaming herself for even taking the jab. and feels guilty about the death of her son.

Your inner ear is important for helping you maintain your balance and equilibrium. It's known that some types of viral infections can impact the inner ear, leading to conditions that cause dizziness or vertigo. One such condition is vestibular neuritis.
Vestibular neuritis happens when an infection causes inflammation of the nerve that connects the inner ear to the brain.
However, this may not be the only way COVID-19 causes dizziness or vertigo

Like · Reply · 7w · 9

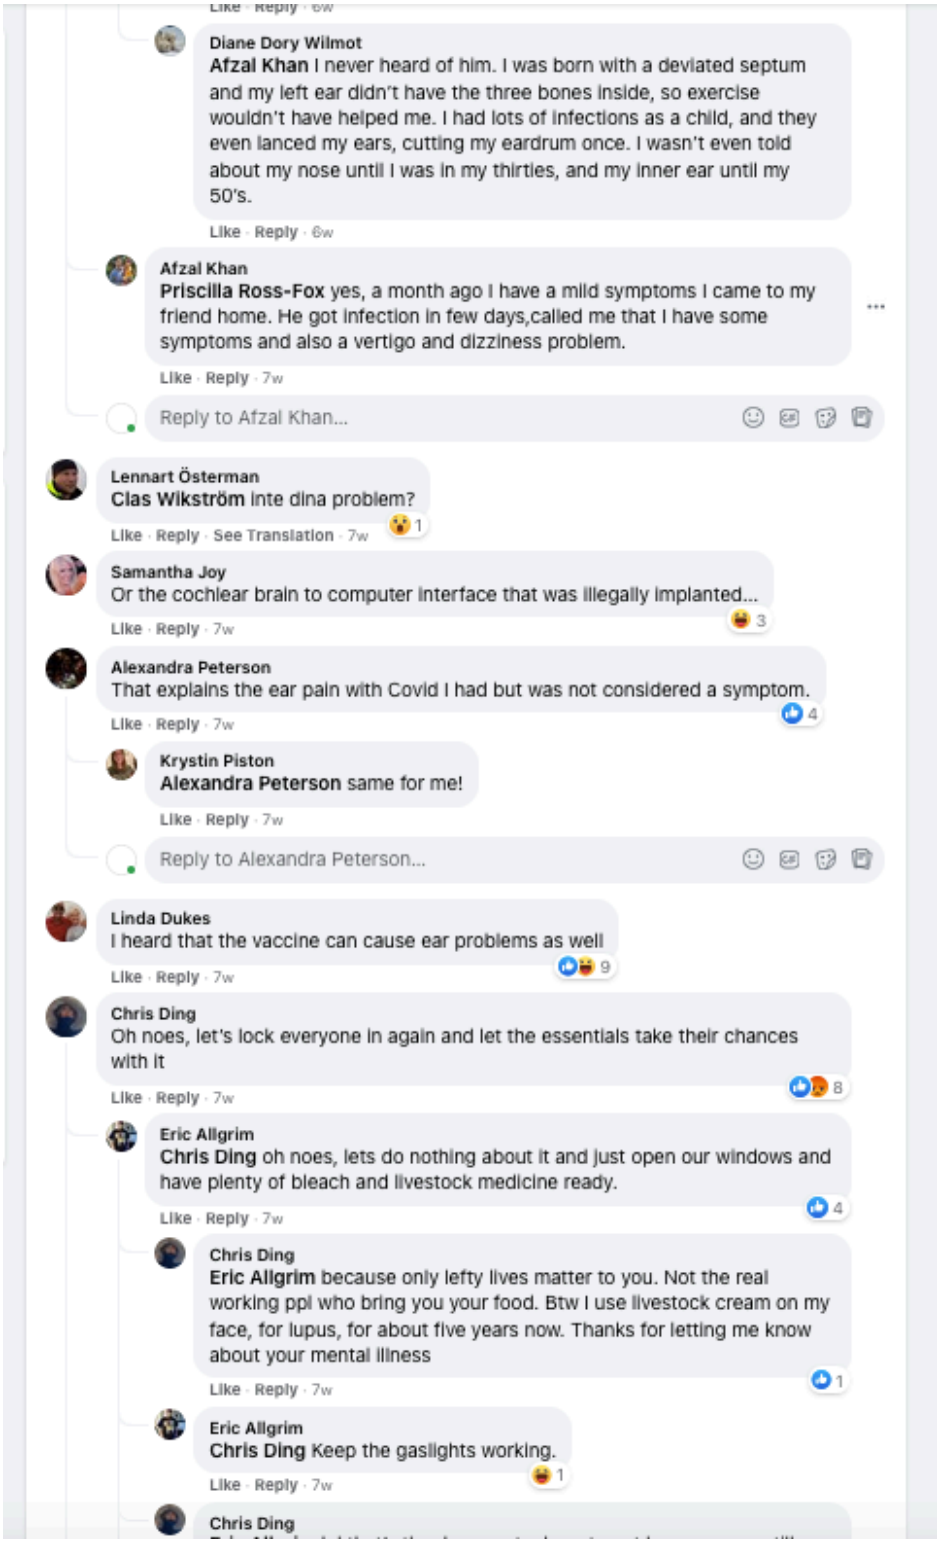

Priscilla Ross-Fox
Afzal Khan I agree. I've known people who had vertigo years ago and I've had it also. I have more opinions but will keep those to myself because of AI go.

Nancy Smith Carroll
Barbara Ellison Michonski I agree that the vaccine would be less damaging to the body than actually having Covid. I had the Moderna two step vaccine and 4 months later, unfortunately I came down with Covid.
It actually has affected my ears and I have been to the doctor.
I fought Covid at home when I initially came down with it. I drank lots of fluids, ate lots of chicken noodle soup and took vitamins and zinc.
My husband's friend now has Covid and was not vaccinated. He has been in and out of the doctor's office and he lost 22 pounds. He sleeps a lot.
His wife and family are extremely worried and they are hoping he pulls through. It is that serious. I am bringing over some soup and zinc tablets to them today. It's hard to find zinc in the stores.
Like · Reply · 7w · 1

Michelle Macky
Nancy Smith Carroll The vaccine is not "less damaging" than Covid... Over 50k deaths WORLDWIDE from the jab... For those people and the hundreds of thousands with permanent heart or neurological damage, the vaccines were far more damaging.
Like · Reply · 7w · 2

Barbara Ellison Michonski
Nancy Smith Carroll obviously some people on here are getting info. From places that doesn't back up the research. That's key. I took a research class in college n that's crucial.

Michelle Macky 🙏So many people have had different side effects you have no idea. I know some people that have died from the vaccination. I know people that have had tremendous complications after the vaccinations. I know people with the vaccination and without the vaccination survived or passed away from covid! People suffering covid after Effects non stop symptoms. They don't know how to treat. Unfortunately it's not one-size-fits-all. So far no Rhyme or Reason this vaccine is even working effectively. I am praying 🙏 I am not anti vaccination. So far it's scary to get it with all the complications that you could get. Then to give it to children we don't know what could happen I say no they have 99.9% to recover statistics. This so-called vaccination isn't living up to what it's supposed to do. Praying they figure this out.🙏I'm sorry for your losses. All the people who have suffered after being vaccinated or death. 😢 I understand it's not one size fits all this so called vaccination! No one knows on any specific vaccine or drug how it will affect them. I had a flu vaccination once. Was in the hospital a month, in a coma for a week with meningitis. My daughter had a flu vaccination just before COVID-19. Poor 37 yr. old had pityriasis rosea all over her body for months. We believe she had COVID-19 in the very beginning 2020 but they weren't testing people then. My doctor said the vaccination it would probably kill me. I can't take antibiotics without reactions. So I do what is best with my body. Plus I know vaccinated people sick with COVID-19 too. Some died being vaccinated too. 😢 How in God's name do the big pharma know how in any situation a person's body will react to either getting COVID. Or a vaccination who can do more harm for them? It's a shot in the dark with or without. 🙏Prayers for us all. ❤️🙏

Fauci (the NIH) and everyone else found to be involved in creating, funding, and trying to cover up the creation of Covid-19 and any other man-made/manipulated virus that has resulted in deaths and outright terrorism should be charged with and found guilty of crimes against humanity. People need to stop blindly trusting people just because they're in positions of "authority" and/or call it "science". They lie, cheat, bully, and manipulate people for their own gains. In addition to millions of people dying from Covid, we now have millions of people who have been injected with an experimental vaccine that's already killing people (including my own Mother) because they're trusting the "science" and the "authority" figures telling them it's what they should do.

Johnna Mellor
Lisa Marie McNally Yep. Blindly following Fauchi, who is a virologist who talks out his a$$, is ridiculous. He has incentives to make poeple believe him, but even people with any background in medical anatomy and physiology can tell you he is misleading people. On purpose, because he does know viruses work. He assumes, in his arrogance, that no one knows that he is a liar and opportunist.

The vax doesn't stop the virus in your sinuses. No reason to believe it stops it in your ear either, so this is NOT a reason to get vaxed. This is why the vaxed spread delta too btw, as it lives in the sinuses of the vaxed, they just don't get sick from it in the rest of their body. Would be good to hear what kills it when in the inner ear though, sinus rinse, etc?
Like · Reply · 7w · Edited
Cyn Ambros
John Kurzman you can't reach the inner ear without cutting open the brain.

Dana Greentree
What?? Your just now figuring out that the brain controls everything. And all that communication between the brain and the body, run thought the neurological system, other wise called the nervous system. And if there is any kind of damage or blockage, on those nerves, can and will interrupt those messages, and when those messages get disrupted, it can cause dysfunction to all body function, that leads out from the area that is getting blocked or interrupted. And her is more information, Pain is like the check engine light in a technical, again communication that there is a mechanical malfunction in the are where the pain is occurring. PAIN IS NOT A MENTAL ISSUE, and whoever is saying that is totally ignorant about pain and it's fiction, and is getting paid to spread half truth and misinformation. Not everything that happens in the brain is a mental issue.

Like · Reply · 4w 4

Ayub Jamshaid
Dana Greentree you have a lot to learn still about pain science

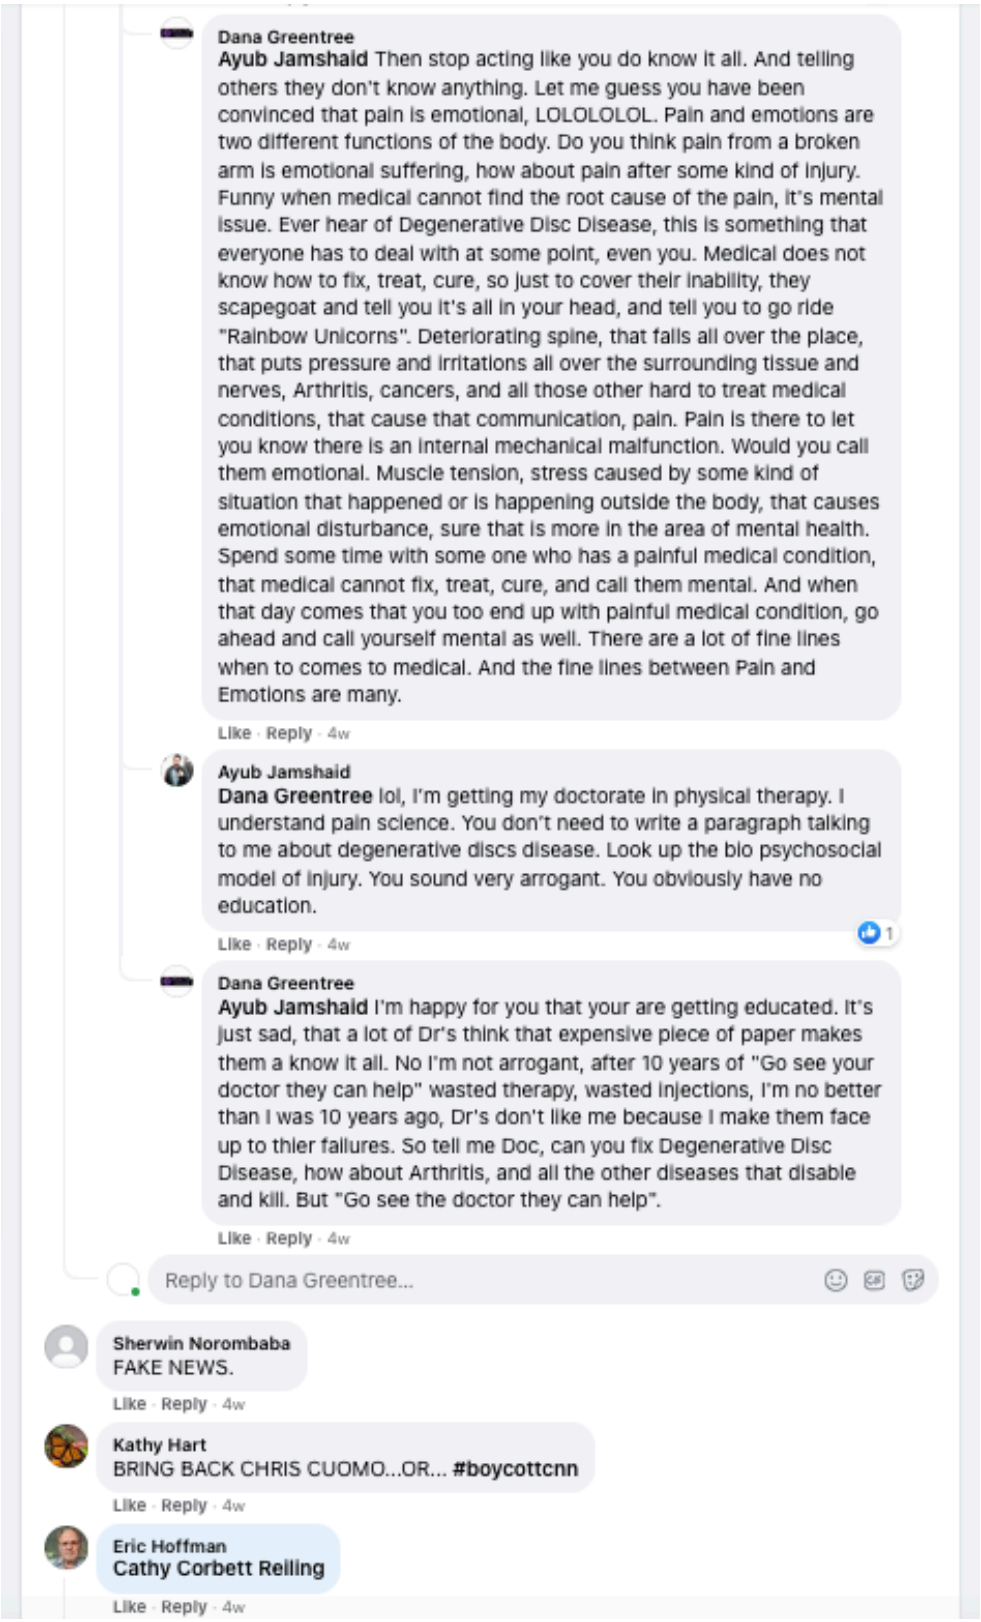

Like · Reply · 4w 2

Dana Greentree
Ayub Jamshaid I guessing you know it all???? So tell me.

Like · Reply · 4w

Ayub Jamshaid
Not my job to educate you... read some articles or books on pain science lol.

1

Dana Greentree
Ayub Jamshaid Then stop acting like you do know it all. And telling others they don't know anything. Let me guess you have been convinced that pain is emotional, LOLOLOLOL. Pain and emotions are two different functions of the body. Do you think pain from a broken arm is emotional suffering, how about pain after some kind of injury. Funny when medical cannot find the root cause of the pain, it's mental issue. Ever hear of Degenerative Disc Disease, this is something that everyone has to deal with at some point, even you. Medical does not know how to fix, treat, cure, so just to cover their inability, they scapegoat and tell you it's all in your head, and tell you to go ride "Rainbow Unicorns". Deteriorating spine, that falls all over the place, that puts pressure and irritations all over the surrounding tissue and nerves, Arthritis, cancers, and all those other hard to treat medical conditions, that cause that communication, pain. Pain is there to let you know there is an internal mechanical malfunction. Would you call them emotional. Muscle tension, stress caused by some kind of situation that happened or is happening outside the body, that causes emotional disturbance, sure that is more in the area of mental health. Spend some time with some one who has a painful medical condition, that medical cannot fix, treat, cure, and call them mental. And when that day comes that you too end up with painful medical condition, go ahead and call yourself mental as well. There are a lot of fine lines when to comes to medical. And the fine lines between Pain and Emotions are many.

Like · Reply · 4w

Ayub Jamshaid
Dana Greentree lol, I'm getting my doctorate in physical therapy. I understand pain science. You don't need to write a paragraph talking to me about degenerative discs disease. Look up the bio psychosocial model of injury. You sound very arrogant. You obviously have no education.

Like · Reply · 4w · 1

Dana Greentree
Ayub Jamshaid I'm happy for you that your are getting educated. It's just sad, that a lot of Dr's think that expensive piece of paper makes them a know it all. No I'm not arrogant, after 10 years of "Go see your doctor they can help" wasted therapy, wasted injections, I'm no better than I was 10 years ago, Dr's don't like me because I make them face up to thier failures. So tell me Doc, can you fix Degenerative Disc Disease, how about Arthritis, and all the other diseases that disable and kill. But "Go see the doctor they can help".

na.tabesh Are Irritable Bowel Syndrome and Ulcerative Colitis Related?
Yes, only the organ is involved in each colon.
We successfully passed the irritable bowel syndrome.
But we have been on ulcerative colitis Crown colitis for a long time without result.
During this time, only the diameter of the fistula narrows slightly to the skin.
Only this.
Do you have a solution?
Precisely what has been done with migraine headaches with a 95% recovery rate.
But we are helpless in cluster headaches.
There is a bad type in every type of disease.

saveourchildrenow The Hawaiian Government is trafficking Children. Waikiki is a Hotspot for child prostitution. The U.S Government and Local City Officials are involved in child trafficking networks in Hawaii. The Military and Honolulu Police department has many ties associated with child trafficking networks.
