Good Morning,

I wanted to reach out with a concern and recommendation that I have in regards to the use of social media identifiers in the screening and vetting process. My overall concern is that the PP10141 report will reflect a negative perspective on the usefulness of social media identifiers. The NGO's are planning on gaining access to this report and per my discussions with ODNI CLPT the thought is that social media identifiers will no longer be collected, since they add no value. While the answer is appropriate that there is little value in S&V, there are tertiary affects that are not being thought through at an enterprise level. I would hate to see that this impact the USG's ability in the future to collect and use for I2 purposes.

(b)(5)

Please let me know as soon as possible your thoughts, so I can make the appropriate updates in the report and for overall ODNI.
